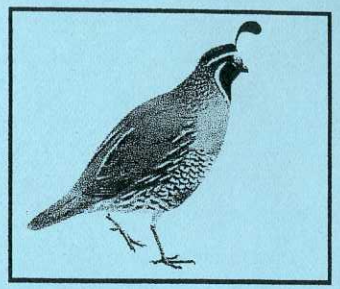
Initially published: January, 1996
First Revision: March, 2001

List prepared by Paul Cooley and Allan Kotin, orignally based in part on a prior list prepared by Steve Saffier. The list is generally sequenced and labeled in accordance with the recent standard species nomenclature used by the American Ornithologists' Union as customarily reported in general circulation birding periodicals.

THE SANTA MONICA MOUNTAINS NATIONAL RECREATION AREA

The Santa Monica Mountains comprise virtually the only relatively undeveloped mountain range in the United States that bisects a major metropolitan area. A large portion of this range is preserved from further development as the Santa Monica Mountains National Recreation Area, an element of the National Park System. The Santa Monica Mountains Conservancy, the Mountains Recreation and Conservation Authority (MRCA), the William O. Douglas Outdoor Classroom (WODOC), and the National Park Service sponsor many activities, all intended to increase the public's awareness of this unique resource. For a current list of public walks and other activities, please consult the National Park Service quarterly publication "Outdoor Recreation in the Santa Monica Mountains National Recreation Area",



THE BIRDS OF FRANKLIN CANYON

A REVISED FIELD CHECKLIST

Prepared by

PAUL COOLEY and ALLAN KOTIN

March, 2001

1	2	3	SPECIES	STATUS	
			GREBES		
			PIED-BILLED GREBE	C	R#
			WESTERN GREBE	O	M
			PELICANS
